

KRISHNA NAND GUPTA

Gorakhpur, Uttar Pradesh | +91 9569521822 | madehsiyakrishna666@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, expected 2027) with hands-on experience building React.js web applications, API-integrated frontends, and reusable component systems. Working knowledge of SQL and structured data handling (JSON, REST). Actively developing skills in Quadient Inspire (Designer, Automation, Scaler, Content Manager), Groovy scripting, and XML/XSD/SOAP data exchange to support enterprise CCM workflows. Fast learner and collaborative Git/GitHub contributor, seeking a CCM/Quadient Inspire Developer internship to apply development fundamentals to enterprise document automation.

TECHNICAL SKILLS

Programming & Scripting: JavaScript (ES6+), HTML5, CSS3, SQL (SELECT, JOIN, WHERE, GROUP BY, aggregate functions)

CCM & Enterprise Concepts: Quadient Inspire fundamentals (Designer, Automation, Scaler, Content Manager, Interactive, Approve Workflow), Customer Communication Management (CCM), Enterprise Application Integration basics

Data & Integration: RESTful API Integration, JSON, structured data handling, XML, XSD, XPath, SOAP (working familiarity)

Frameworks & Libraries: React.js, Tailwind CSS

Tools & Platforms: Git, GitHub, GitHub Actions, VS Code, Vercel

Core Concepts: Responsive Web Design, Reusable Component/Template Architecture, Dashboard Systems, DOM Manipulation, UI/UX Design, Form Validation & Accessibility

PROJECTS

Customer Relationship Management (CRM) Dashboard *React.js | Tailwind CSS | JavaScript | GitHub*

- **Architected** a responsive, data-driven React dashboard with modular reusable components, increasing administrator task efficiency by ~35%.
- **Optimized** React rendering and API-integrated state management, cutting average page load time by ~40% — transferable to processing structured data feeds in automation pipelines.
- **Led** a 3-person GitHub workflow using feature branching, pull requests, and weekly syncs, mirroring collaborative practices used in enterprise software delivery.

E-Commerce Website Frontend *React.js | Tailwind CSS | Responsive Design | Vercel*

- **Built** a fully responsive frontend supporting multiple screen breakpoints, integrating dynamic data via REST APIs.
- **Developed** reusable React components (product cards, navigation bars, filter drawers), applying component/template-based design principles transferable to Quadient Inspire's modular content design.
- **Deployed** continuous integration/delivery pipelines using Vercel and GitHub Actions, demonstrating familiarity with automated build/release workflows.

User Registration & Authentication UI *HTML5 | CSS3 | JavaScript | DOM Manipulation*

- **Implemented** real-time form validation logic, reducing form submission errors — directly applicable to rule-based validation in Approve Workflow-style CCM systems.
- **Applied** semantic HTML, ARIA labels, and keyboard accessibility for standards-compliant, structured markup.
- **Engineered** reusable input components with a focus on clean, structured, rule-based data capture.

WHY I'M A FIT FOR THIS ROLE

- Built and optimized data-driven, component-based systems in React — the same modular, rule-driven mindset that underpins Quadient Inspire's template and content-block architecture.
- Hands-on with structured data/API integration (JSON, REST) and a demonstrated fast, self-directed ramp-up on new tools — now applied to Quadient Inspire, Groovy, and XML/SOAP ahead of interviews.

EDUCATION

Bachelor of Technology (B.Tech.), Computer Science and Engineering *Expected Graduation: 2027*

Ambalika Institute of Management and Technology, Lucknow, Uttar Pradesh

ADDITIONAL INFORMATION

Languages: English, Hindi | Available for a 6-month full-time internship (Work from Office, Lucknow)
